## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "adjustable rest that moves with six degrees of freedom" and the "adjustable rest further including a viewer restraint" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because:

- a. Reference characters "11" and "13" have both been used to designate "translation stages". If elements 11 and 13 represent a different translation stage, then the applicant is respectfully requested to make said clarification.
- b. Reference characters "42" and "44" have both been used to designate "eye position". It is not clear if elements 42 and 44 are the eye position for the left and/or right eye.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. Applicant is required to submit a proposed drawing correction in reply to this Office action. However, formal correction of the noted defect may be deferred until after the examiner has considered the proposed drawing correction. Failure to timely submit the proposed drawing correction will result in the abandonment of the application.

***Allowable Subject Matter***

4. Claims 1-33 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach an image display system, comprising in combination with the additionally recited elements, a control system responsive to the signal for providing relative motion between the viewer and the image projector to maintain the viewer's eyes at the exit pupil.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Richards (US Patent Number 6,163,336) discloses a tracking system for stereoscopic display systems.

Kessler (US Patent Number 6,416,181 B1) teaches a monocentric autostereoscopic optical apparatus and method.

Agostinelli et al. (US Patent Number 6,511,182 B1) shows an autostereoscopic optical apparatus using scanned linear image source.

Cobb et al. (US Patent Number 6,522,474 B2) discloses a head-mounted optical apparatus for stereoscopic display.

7. This application is in condition for allowance except for the following formal matters:

- a. The drawings must show every feature of the invention specified in the claims. Therefore, the "adjustable rest that moves with six degrees of freedom" and the "adjustable rest further including a viewer restraint" must be shown or the feature(s) canceled from the claim(s).
- b. Reference characters "11" and "13" have both been used to designate "translation stages". If elements 11 and 13 represent a different translation stage, then the applicant is respectfully requested to make said clarification.
- c. Reference characters "42" and "44" have both been used to designate "eye position". It is not clear if elements 42 and 44 are the eye position for the left and/or right eye.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

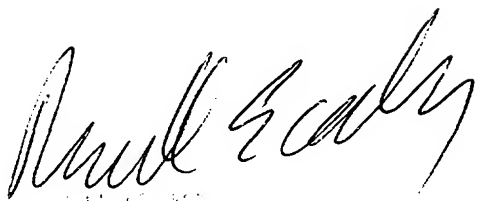

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
